PROFESSIONAL PROFILE

Full Stack Developer with 10+ years of experience building high-impact web and mobile applications. Specialist in React, Node.js, and microservices architecture, with strong expertise in AWS, GraphQL, and CI/CD pipelines. I have led projects end-to-end — from API design to production deployment — for companies like OCC Mundial, Nexta, and national and international freelance clients. I am looking for a team where technical excellence and real product impact are the priority.

PROFESSIONAL EXPERIENCE

Full Stack Developer *Nov 2016 – Present*

Adeev (Freelance)

- AI recruitment chatbot: Laravel + ReactJS + OpenAI, deployed on AWS Lambda, DynamoDB, and S3.
- Mobile app and web platform for auto repair shop management using React Native, ReactJS, and Firebase.
- Payment gateway integration: PayPal, Stripe, MercadoPago, and OpenPay across multiple platforms.
- Frontend development for Pemex's legal demand management system using VueJS.
- Desktop apps with Electron for Hasbro City and KidZania venue management.
- Campus emergency alert system built with Laravel and mobile APIs.
- Java APIs for managing order status in a pharmacy management system.
- Basic invoice management system for VOLVO using CodeIgniter 4, integrated with SAT (Mexico's tax authority) web services.
- Maintenance of Python Lambdas for data lake processes, review of existing logic, adjustments, and support for data processing workflows.
- Full-stack project developed with Django to centralize administrative workflows, user authentication, operational dashboard, and billing module.

Full Stack Developer Senior *Oct 2023 – Oct 2024*

OCCMundial

- Built modules with React + Next.js, Redux, and GraphQL for one of Mexico's largest job platforms.
- Developed microservices with Node.js / Express.js and AWS Lambda functions connected to DynamoDB.
- Wrote unit tests with Jest and established a design token system using Tailwind CSS.

Senior Frontend Developer *Jul 2021 – Jul 2023*

Nexta

- Built a CMS in React JS to manage content for a mobile application.
- Developed RESTful microservices in C# (.NET) using hexagonal architecture and Entity Framework.
- Created Node.js/Express microservices with Sequelize and integrated APIs into React Native/Expo apps.

Full Stack Developer *Jan 2018 – Jul 2021*

OCCMundial

- Developed React JS applications consuming REST APIs, using Redux, Jest, and OCC Atomic CSS framework.
- Built microservices with C# / ASP.NET Core, Java Spring Boot, and Node.js on AWS.
- Maintained the OCC Atomic component library and collaborated closely with the design team.

Web Developer *Jun 2016 – Dec 2017*

NCTech

- Developed an e-learning platform using PHP, CodeIgniter, MySQL, and jQuery on Linux.

Web Developer *Jan 2015 – Jun 2016*

Innovation Workshop (IW)

- Built responsive and manageable websites using WordPress, MySQL, and PHP.

TECHNICAL SKILLS

Frontend:	React JS · Next.js · VueJS · Angular · React Native · Electron JS · PWA · HTML5/CSS3 · Tailwind · Bootstrap · Material UI · PrimeReact
Backend:	Node.js · Express · PHP · Laravel · CodeIgniter · C# ASP.NET · Java Spring Boot · Python
Cloud & DevOps:	AWS Lambda · DynamoDB · S3 · AWS SDK · Firebase Services
Databases:	MySQL · SQL Server · DynamoDB · Sequelize · Entity Framework
APIs & Other:	GraphQL · RESTful APIs · Redux · Jest · Git · Graphic Design · WordPress · Shopify

EDUCATION

B.S. in Information and Communication Technologies 2010 – 2015

Instituto Tecnológico de San Juan del Río

Diploma in High-Impact Executive Leadership Sep 2023 – Mar 2024

Universidad Anáhuac

LANGUAGES

Spanish — Native

English — Intermediate (conversational, technical reading)
